Mechanicsburg Area High School

May 2022 Progress Video

<https://www.youtube.com/watch?v=ImOiDTpEook>

eciConstruction has been working on Mechanicsburg Senior High School. The project includes a single-story administration addition to the front of the school. This addition includes a nurse office, guidance office, staff offices, as well as a new main entrance. Toward the back of the high school, eciConstruction has been building a new two-story classroom addition that includes a fitness center, science classrooms, student classrooms, and a small café.

The school gymnasium is also receiving a renovation, which will include new flooring, gym equipment, and bleachers. The school's previous administration office will be remodeled as well and turned into restrooms, storage rooms, and a corridor.

Additionally, eciConstruction has been providing site work improvements, including working on their parking lots, updating stormwater utilities, updating water line utilities, and adding new concrete plaza entrances.

WARWICK FIELD HOUSE

Recently, eciConstruction and Midstate Mechanical & Electrical have been working on the Warwick Field House located in Lititz, Pennsylvania.

Once construction is finished the field house will feature an officials room, team locker rooms, bathrooms, concessions area, trainers rooms, and a storage area. Additionally, bleachers will be installed on top of the new field house. eciConstruction is also creating a new synthetic turf field that will be adjacent to the field house. The project includes multiple parking lot expansions for the district as well.

Construction for the project commenced in February 2022 and is expected to be completed by August 2022.

SHREWSBURY TOWNSHIP MUNICIPAL CENTER

This project will become the new municipal center and maintenance garage for Shrewsbury Township. The office area will be 8,500 square feet, and the maintenance shop will be 9,000 square feet.

The project started in September of 2021 and is scheduled for completion in November of 2022. The administration area will include admin offices, meeting rooms, and maintenance offices. The maintenance area of the project will include a vehicle lift, wash bay and mechanical workspace for the maintenance staff. The main administration area will also feature exposed glulams with tongue and groove decking, and the maintenance shop will be a pre-engineered metal building.
